Custom, Realistic & Comfortable  
Erection Sleeves

## We can help you

Millions of men are dealing with unforeseeable & unimaginable conditions relating to their health. These pressing issues can prohibit men from living the desirable & sexual lifestyle they deserve.

If you are suffering from Erectile Dysfunction or a medical condition that prohibits you from maintaining an erection, RX Sleeve can help.

Our patented Harness System is durable, comfortable & easy to wear. Our product line will not interfere with medications and is affordable. Each RX Sleeve is handmade from a certified skin safe premium silicone & can be customized to your specific needs.

Give one a try, you deserve it.

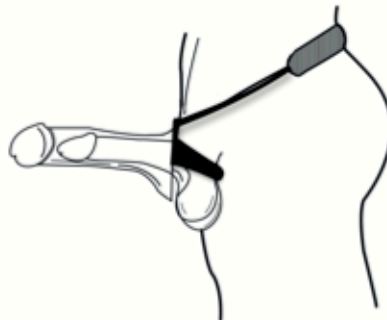

## Custom Product

**BUILD YOUR PERFECT CUSTOM SLEEVE**  
We can design a custom sleeve for you.  
Please email: [hello@rxsleeve.com](mailto:hello@rxsleeve.com) for more information.

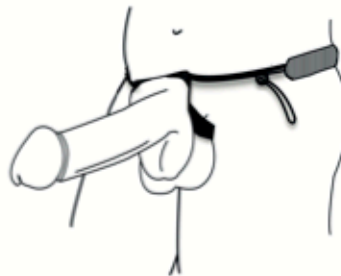

## Non-Pinching Harness

Stretch the comfortable silicone loop open & carefully slide testicles into the hole. Next, place your penis into the shaft's inner hole. Lubricant & suction can help slide the sleeve on.

Avoid slipping with the soft adjustment belt

## End Performance Anxiety

If you suffer from one of the following conditions, RX Sleeve is for you:

### Prostate Cancer

Once surgery and treatment have been completed, complications may hamper your ability to achieve an erection. If the cavernous nerves have been damaged it will be difficult to maintain a healthy sexual lifestyle.

### Diabetes

Diabetes can cause damage to nerves & blood vessels, which can lead to erectile dysfunction.

### Hypertension

High blood pressure is a major cause of erection problems. A study found that about 49% of men ages 42 to 79 with high blood pressure had erectile dysfunction.

### Medication Interactions

Treatment for cardiovascular diseases may require several medications. Proper pharmaceutical monitoring of all prescriptions must be closely administered by a physician.

### Decreased Libido

Loss of sexual interest can be derived from many factors such as stress, depression, alcohol or drug use, lack of sleep, hormone imbalance, relationship issues & other health conditions.

### Micro Penis

This is a condition that refers to any erect penis smaller than 2.8 inches in length.

### Genital Injury

This type of injury is very painful and damage may vary from temporary to a permanent disability.
